# NARCISSUS — DAFFODILS

These are the most popular of the Spring flowering bulbs, for they bring to the garden the first lavish display of color in the Spring. They bloom from March until well into May, and by careful selection of varieties continuous bloom may be had for over a month. Their wealth of yellow color makes them particularly desirable for brightening up borders and clumps of shrubbery, and an entire bed of them is a gorgeous sight. Plant in Fall before ground freezes and cover the bulbs one and a half times their depth. Their ease of culture makes them one of our most desirable bulbs.

Prices quoted are for Mammoth Double Nosed Bulbs of the very best quality.

# NARCISSUS — DAFFODILS

These are the most popular of the Spring flowering bulbs, for they bring to the garden the first lavish display of color in the Spring. They bloom from March until well into May, and by careful selection of varieties continuous bloom may be had for over a month. Their wealth of yellow color makes them particularly desirable for brightening up borders and clumps of shrubbery, and an entire bed of them is a gorgeous sight. Plant in Fall before ground freezes and cover the bulbs one and a half times their depth. Their ease of culture makes them one of our most desirable bulbs.

Prices quoted are for Mammoth Double Nosed Bulbs of the very best quality.
